

# Giant Hole Appears in Lake!

Thursday night a hole with a 50ft diameter appeared in the center of the lake. The hole created an empty space in the water and goes 56ft down to the Lake floor. It was discovered by a local fisherman who saw it when he was reeling in a catfish. The fisherman, John Doe, stated “I was reeling in a real big fish and watching the sun go down when all the sudden this huge hole appeared in front of me.”

## Is it dangerous?

With the hole suddenly appearing it has many wondering if it is dangerous. A local who lives on a houseboat is highly concerned. Maria Debogorski states “I live on the water. What happens if one of these holes appears underneath my house? I have 504 cats that live with me and I don’t want to see them or me get hurt.” Local scientist Jane Doe wants to calm concerns “Currently we are evacuating the area near the lake out of **precaution**. *The hole doesn’t appear to be dangerous* and hasn’t harmed anyone yet. The evacuation is a simple precaution as we don’t believe the hole to be dangerous and it so far appears to be a weird phenomenon.”
